

ALL AFRICAN AIRWAYS EUROPE TOUR

Let's further explore our beautiful world by means of a short tour to various International airports, all based in Europe. Pilots are invited to complete this tour with a Captain (or below) rated aircraft.

Flight legs must be flown in sequence, and the same aircraft must be used for all tour legs.

Leg	ICAO	Arrival	Dist (nM)	Deg Magnetic
1	LFPG	EDDF	243	072
2	EDDF	EHAM	198	312
3	EHAM	LPPT	997	219
4	LPPT	LSGG	808	053
5	LSGG	LGAV	935	113
6	LGAV	LIRF	586	292
7	LIRF	LFPG	594	316
Total distance			4361 nM	

For added immersion, pilots are encouraged to complete this tour in real time and under real weather conditions, although this is not mandatory for a successful tour completion. However, the tour must be completed with normal simulator speed (accelerated flights are not allowed), and all flight legs must be logged by means of your Virtual Airline flight tracking system. Once you've started the tour, you must complete it, you're not permitted to do any other flights while you're busy with this tour.

Exploring Europe is fun, as long as you understand your aircraft limitations, invest a lot of time in the tour, and by planning each flight leg properly. Pilots may use route waypoints at their own discretion for each flight leg.

Once you've completed the whole tour, please complete the applicable tracking sheet for the tour and email it to your hub manager for evaluation, after which we will award you with the appropriate tour accomplishment badge.

Thank you for participating in the All African Airways Europe tour, we wish you safe and enjoyable flights.
