

ALL AFRICAN AIRWAYS DC-3 BLAST FROM THE PAST TOUR

Pilots are invited to complete the All African Airways “BLAST FROM THE PAST” tours (this one specifically customised for the DC-3), by completing the following Southern Africa flight legs consecutively, with a DC-3 Dakota, which is based at our Cape Town Airport All African Airways museum.

Flight legs must be flown in sequence, and the same aircraft must be used for the whole tour. Once you’ve started the tour, you have to complete it, you are therefore not permitted to conduct any other flights between tour legs.

Leg	ICAO	Arrival	Dist (nM)	Deg Magnetic
1	FACT	FAOB	89	139
2	FAOB	FAGG	110	100
3	FAGG	FAPE	161	118
4	FAPE	FAEL	125	092
5	FAEL	FAOH	285	291
6	FAOH	FARS	114	290
7	FARS	FAWC	26	315
8	FAWC	FALW	75	329
9	FALW	FAYP	58	188
10	FAYP	FACT	6.8	154
Total distance			1043 nM	

For added immersion, pilots are encouraged to complete this tour in real time and under real weather conditions, although this is not mandatory for a successful tour completion. However, the tour must be completed with normal simulator speed (accelerated flights are not allowed), and all flight legs must be logged by means of your Virtual Airline flight tracking system.

Flying low and slow with vintage aircraft is really fun, since the basic principles of flight always remain the same, and sometimes it’s just great to fly without all the bells and whistles and automation systems that you’ll find in bigger jets.

Once you’ve completed the tour, please complete the applicable tracking sheet for the tour and email it to your hub manager for evaluation, after which we’ll award you with the appropriate tour accomplishment badge.

Thank you for participating in the **All African Airways Blast from the Past tour**, we wish you safe and enjoyable flights.
